

Brandon Valentine

Junior Software Developer

troope@me.com | 410-905-4544 | GitHub: trooper929

Professional Summary

Junior software developer transitioning from technical operations and emergency systems support into full-stack development. Currently completing a full-stack web development program with hands-on experience in JavaScript, Node.js, Express, React, and MySQL. Strong background in systems reliability, troubleshooting, and data accuracy in high-responsibility environments.

Technical Skills

JavaScript (ES6+), Node.js, Express, React, MySQL, REST APIs, CRUD Operations, Data Validation, Error Handling, Git & GitHub

Projects

- Built RESTful APIs using Node.js and Express with full CRUD functionality.
- Developed React applications that render dynamic data and manage application state.
- Implemented input validation and error handling to ensure data integrity.
- Integrated MySQL databases for persistent storage and querying.

Professional Experience

Systems & Communications Technician (Emergency Operations)

MWAA – Washington, DC | Jan 2021 – Aug 2025

- Maintained and monitored mission-critical communication and computer-based systems.
- Troubleshot system failures under time-sensitive conditions, ensuring operational continuity.
- Ensured system reliability, data accuracy, and compliance with security protocols.
- Worked within regulated environments requiring strict validation, documentation, and audits.

Transportation Associate

Amazon Fulfillment Center | Nov 2018 – Dec 2020

- Supported logistics operations with a strong focus on accuracy, safety, and process compliance.

Education

Full-Stack Web Development Program — In Progress

High School Diploma — Freestate Challenge Academy
